RELEVANT WORK EXPERIENCE

– WebstaurantStore | Remote –

Junior Software Engineer 2

Jan 2026 - Present

- Deliver features and bug fixes for a customer- and internal-facing portal. Worked on a cross-functional team composed of a Business Analyst, a Product Owner, and engineering counterparts.
- Build backend endpoints in C# using controller and repository patterns, and write SQL stored procedures to support new features.
- Develop responsive UI components, forms, modals, and pages in TypeScript, React, and Ant Design.
- Ensure code reliability through unit testing, integration testing, and manual QA testing, and diagnose bugs using Sentry error logs and IDE debugging tools.
- Contribute to a shared codebase using Git branching strategies and Azure DevOps CI/CD pipelines to deliver code to production.
- Leverage GitHub Copilot CLI to accelerate feature development and debugging.
- Collaborate with the Business Analyst, Product Owner, and other engineering teams to clarify requirements and align on implementation details.
- Participate in Agile Scrum ceremonies (standups, sprint planning, retrospectives) and code reviews to support team delivery and code quality.

Junior Software Engineer 1

July 2025 - Jan 2026

Software Engineer Intern

May 2024 - Aug 2024

- Contributed to the internal developer-portal team, working on the back-end of an automated quality-control plugin through code contributions, reviews, and cleanup.
- Refactored code to improve readability, consistency, modularity, and maintainability while ensuring compliance with industry and company standards.
- Received a return offer to join as a full-time Software Engineer.

– University of Pittsburgh | Pittsburgh, PA –

Undergraduate Teaching Assistant (CS 441: Discrete Structures for CS)

Aug 2023 - Dec 2023

- Communicated complex concepts to students by breaking them down into small, digestible parts. Used real-world examples and interactive problem-solving techniques to enhance comprehension.
- Led weekly recitation sessions to reinforce key concepts and guide students in their learning.
- Provided individualized support during office hours, tailoring explanations to enhance understanding.

EDUCATION

Bachelor of Science in Computer Science, University of Pittsburgh, Pittsburgh, PA,

May 2025

GPA: 3.61

Dean's List: 6 semesters

SKILLS

TypeScript | C# | React | SQL | HTML | CSS | Java | C

TECHNOLOGIES

VSCode | VisualStudio | Azure Dev Ops | Git | Rancher | Docker | Sentry | New Relic

PROJECT EXPERIENCE

HTML/CSS: Portfolio Website- <https://scottschwartz342.github.io/>

AI/React/TypeScript: Dummy Wordle with AI Solver - <https://scottschwartz342.github.io/dummy-wordle/>

- A clone of the popular New York Times game Wordle, where you have 6 tries to guess a 5-letter word.
- Features an AI solver that uses Bayes' theorem and the product rule to choose the best guess or attempt to solve the puzzle.

JavaScript: The Typing Monkey - <https://scottschwartz342.github.io/typing-monkey/>

- JavaScript project based on the Infinite Monkey Theorem. Features a "monkey" randomly typing for a user-set amount of time. Tracks how many valid words were typed in said amount of time.

LEADERSHIP/COMMUNITY ENGAGEMENT/WORK EXPERIENCE

Event Security – Taylor Swift, Drake & J. Cole concerts, Landmark Security

Jun 2023 & Feb 2024

Social Communications, American Cancer Society on Campus at Pitt

Dec 2022 – May 2023

Chief Justice, Judicial Board, Sigma Alpha Mu, Psi Chapter Executive Board

May 2022 – May 2023

Inbound Specialist, Target

Jun 2022 – Aug 2022

Grassroots Soccer Referee, Long Island Junior Soccer League

Apr 2016 – Nov 2022
